Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. In the previous office action mailed 2/9/06, the Examiner made a restriction requirement by original presentation because new claims drawn toward a second invention, separate and distinct from the first invention, were presented by the applicant after receiving a first action on claims directed toward a first invention.
2. In the instant response, the applicant attempts traverse the restriction by original presentation on the ground(s) that the new claims would not present extra or undue burden on the Examiner as the two sets of claims are closely related as combination usable together and request a showing that one of the subcombinations has utility other than the disclosed combination. This is not found persuasive because the claims of the original invention is directed toward a storage controller system and method (first subcombination) for its use comprising limitations requiring receiving commands from a host and processing the command or forwarding the command to another storage controller based on the command, classified in 710/5. The claims of the newly presented claims are directed toward a network virtualization device comprising a Fibre Channel

switching module and associated controller (second subcombination) comprising limitations requiring transferring data received from an input port to an output port determined by the contents of the received data, classified in 710/316. The first subcombination could be used in a system where data from a first storage system is being migrated to a second storage system, while concurrently receiving data from the host without the host having any knowledge of the migration. This utility is outside of the disclosed combination.

The requirement is still deemed proper and is therefore made FINAL.

3. The instant amendment canceling all claims drawn to the elected invention (by original presentation) and presenting only claims drawn to a non-elected invention (newly presented claims) is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention for the reasons set forth above.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission
